

## OBN Philosophy

*Think different solution which is cost effective for the same trade which most successful companies are doing at the high cost.*

## About Us

Established in the year 2012, OBN is aggregate Express Courier and Logistics solution company for Domestic and International services. In the vast country like India, with 39,000 and odd Pin Codes, Regional courier companies are the best in Service and reach. OBN research and network design team has chosen the best Regional companies in India on its list of associates and created the National network of services. For international, OBN has strategic service level agreement with best in the world and serve 180 destinations.

Assured delivery, odd hour pick-up and dynamic pricing policy make OBN, the preferred service provider for the customers.

Our PMS & DMS products (Pick-up management services and Delivery Management services), separate us from the lot. These unique service solutions allow customers to commit pick-up and delivery from anywhere to anywhere at little extra cost. With OBN just select pick-up and delivery station and leave everything else for us. We promise complete peace of mind.

- Commercial charges, custom clearance, duties and taxes, fuel surcharge, address change (if any) will be charged extra,
- Goods and Service tax (GST) will be applicable on total invoice.

## Volumetric weight Calculator

### To calculate Volumetric / dimensional Weight,

Measure the length\*/ width and height of the consignment in centimetres and divide it by 5,000 to get the volumetric weight in kilograms.

If the length\*/ width and height of the consignment is measured in inches, then divide it by 366.

If the volumetric weight is greater than the actual weight of the shipment, shipper will be billed as per volumetric weight.

**DOMESTIC: (L X W X H) in CM/ 6000 = Kilograms**

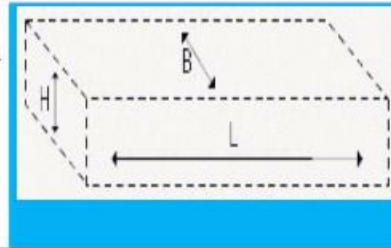

**INTERNATIONAL: (L X W X H) in CM/ 5000 = Kilograms**

\*Length is defined as the longest side of the consignment.

### Volumetric Weight Calculation

Length (cm) x Width (cm) x Height (cm)<sup>\*</sup>  
5000

Length (inch) x Width (inch) x Height (inch)  
366
